ZYLAFEN MEDICATED SKIN THERAPY FOR REPTILES

Skin Care for Reptiles

ZYLAFEN contains three active enzymes, the Lactoperoxidase System plus the additional anti-microbial actions of Lysozyme and Lactoferrin, to provide the most potent and safe treatment available for bacterial, viral and fungal skin infections.

- Antibacterial
- Antifungal
- Antiviral
- One step treatment that can be safely used on all reptiles
- 100% safe if ingested

ZYLAFEN is effective against the following reptile skin and mouth infections: SCUD (Septicemic Cutaneous Ulcerative Disease) Superficial lesions of the skin and shell Dysecdysis (abnormal shedding of the skin) Mouth rot Gingivitis

Directions: Apply Zylafen directly onto reptile skin with clean applicator. Use twice daily for two weeks.

Note: Keep reptile in clean environment during treatment. If exposure to water occurs, dry area and reapply Zylafen.

Zylafen contains the "Zymox Three Enzyme System" in treating reptile skin infections and dermatitis.

Size: 1.25 fl. oz.
