BITTER YUCK!™ FOR DOGS & CATS

Naturvet

No Chew Spray

Water-Based

Will NOT STING like other no chew products

Understanding Why Your Pet Chews:

Pets chew for various reasons; teething, exploration, separation anxiety, boredom and stress. Chewing is a natural animal behavior, so the goal is to effectively train your pet to chew on appropriate objects. Be sure your pet has appropriate chewing toys such as a Kong® or Nylabone®.

How Bitter YUCK! Works:

To most pets, Bitter YUCK! has an unappealing taste, making chewing on the particular sprayed object unpleasant and decreasing the unwanted behavior. Due to the complexities of taste preferences and behavior issues, results may vary. It is important to monitor your pet's reaction to Bitter YUCK!. Be sure your pet is deterred by the taste before leaving them alone with the object being sprayed.

Directions:

Spray Bitter Yuck! evenly on hot spots, summer itch, furniture, etc. Use consistently until undesirable habits are curtailed. Do not spray around eyes or nose.

Stops Dogs, Cats & Horses from chewing on:

- Hot Spots

- Summer Itch
- Sores
- Wounds
- Bandages
- Furniture
- Drapes
- Wood
- Paws
- Tails & Manes
- **Bitter Yuck! May be sprayed over topical medication.**
- **Safe for use on plants.**

Active Ingredients:

Bittering Agent (0.075%).
