

DustMitex Ready-To-Use Liquid

Dust Mite, Flea & Pest Control Pet Meds

Kills Dust Mites and Fleas

DustMite and Flea Control, and DustMitex Liquid are safe and effective at ridding the home of these allergen producing pests. Also effective against termites, cockroaches and ants. DustMitex & DustMite and Flea Control Powder works together with The Ecology Works Anti Allergen Solution to first kill the dust mites and second to denature the allergens they produce.

The ingredients of DustMitex and DustMite Powder are the same, with the only change being that DustMitex is in a liquid state, ready to rid your home of dust mites and fleas.

The Clean and Natural Way to Control Dustmites

The Ecology Works DustMite & Flea Control and DustMitex Liquid are a specially formulated borate compound that mixes easily in water and provides long lasting control over dust mites.

Boron is a natural element that is essential for healthy plant growth and aids in the assimilation of calcium in the human body. Borates have a long history of use in insect control, and are effective against fleas, termites, cockroaches and ants.

The Ecology Works has been granted a patent for its use against dust mites.

The Ecology Works DustMite and Flea Control can be applied in several ways:

- For small areas like an upholstered chair, just mix one cup DustMite and Flea Control to a half gallon of water and apply with a spray bottle, or use ready-to-use DustMitex Liquid.
- For larger areas mix and apply by pump sprayer.
- Or you can deep clean by adding The Ecology Works DustMite and Flea Control to carpet steamers when deep cleaning carpets and upholstery.

EPA Registered: In studies conducted at the University of California, The Ecology Works DustMite and Flea Control has been proven to have very low toxicity. Reviewed by the California EPA, it was determined to have insignificant human exposure risk associated with application.

Effective: University tests show one remarkable result is the long term effectiveness The Ecology Works DustMite and Flea Control has on lowering the dust mite populations. The numbers of *D. farinae* detected in these efficacy studies were extremely low in week 2 and almost non-existent by week 8. The Ecology Works DustMite and Flea Control is a true combination of low toxicity and long term effectiveness. We suggest 4 months between the first and second application and twice a year thereafter.

Safe for Fabric: The Ecology Works DustMite and Flea Control is clear and odorless, has a neutral pH, and will not stain lightly colored fabrics.
