KMR® POWDER

PetAg

Kitten Milk Replacer

Food supplement for cats

For kittens newborn to 6 weeks of age

MADE IN THE USA

#1 Selling Brand

All natural with vitamins, minerals and trace nutrients

Directions for Mixing KMR® Powder

Gently stir or shake 1 part powdered KMR into 2 parts warm water (a part is a teaspoon, tablespoon or cup). Do not mix more KMR than can be consumed in 24 hours. Do not use a blender. Reconstituted KMR should be kept refrigerated. One 12 o.z (340g) can of powder makes approximately 60 oz. (1800mL) of liquid mixed 1:2. One 28 oz. (794g) can of powder makes approximately 140 oz. (4140mL) of liquid mixed 1:2.

Directions for Feeding

All kittens should receive their mother's milk for at least 2 days, if possible. This colostrum milk gives extra nutrition and temporary immunity against some diseases. Warm reconstituted KMR to room or body temperature before serving. **Feed kittens 2 tablespoons (30mL) of liquid KMR per 4 ounces (115g) of body weight daily. The daily feeding amount should be divided into equal portions for each feeding.** Kittens'

needs will vary and this amount may have to be increased or decreased depending on the individual. Young and/or weak kittens should be fed every 3 to 4 hours. Older kittens can do well being fed every 8 hours. Weigh the kittens 3 times per week to assure adequate feeding. **Consult your veterinarian for additional advice.** The PetAg 2 oz. (60mL) Small Animal Nurser is suited for feeding most kittens. When Kittens are old enough to lap, begin offering reconstituted KMR in a saucer. During the 5th week mix reconstituted KMR with KMR® 2nd Step™ Kitten Weaning Food. Use of the KMR and 2nd Step will allow the kitten to be gradually switched to solid food. **Pregnant and lactating queens:** Feed 2 teaspoons (4g) KMR powder per 5 lbs. (2.2kg) body weight daily. **Growing kittens already on solid food, show cats, and/or convalescing cats:** Feed 1 teaspoon (2g) KMR powder per 5 lbs. (2.2kg) body weight daily by top dressing food.

Storage

Opened powder should be stored in a cool, dry place. Reconstituted KMR must be kept refrigerated for up to 24 hours. Opened powder must be refrigerated for up to 3 months, or can be frozen for up to 6 months to preserve freshness.

Ingredients

Dried skim milk, casein, vegetable oil, butterfat, corn syrup solids, mono- and diglycerides of edible fat-forming acids, lecithin, L-arginine, choline chloride, calcium carbonate, potassium chloride, monopotassium phosphate, magnesium sulfate, salt, carrageenan, tricalcium phosphate, dipotassium phosphate, taurine, ferrous sulfate, dicalcium phosphate, ascorbic acid, zinc sulfate, niacinamide, vitamin A supplement, copper sulfate, vitamin E supplement, vitamin D3 supplement, calcium pantothenate, manganese sulfate, potassium citrate, thiamin mononitrate, pyridoxine hydrochloride, riboflavin, potassium iodide, vitamin B12 supplement, folic acid, biotin.
