

## **Kong Extreme Dog Toy**

### **Dog Toys for Power Chewers**

#### **Super-Bouncy and Irresistible**

KONG Extreme is the most durable version of the original Kong. The ultra-strong, black rubber compound is recommended for power chewers and tenacious chewers. It is considered the **World's Best Dog Toy** for its legendary strength, quality and performance. KONGs are widely used for therapy and prevention of boredom, separation anxiety and other behavioral issues. Their unpredictable bounce lures most dogs into a game of chase, catch and chew. The hollow core of the KONG will allow you to stuff it with treats and food to entice play.

KONG Stuff'N treats and pastes work great to initiate play sessions. A dab of peanut butter spread around the inside is very effective.

Put Your Dog to Work! Providing food and/or treat stuffed KONGs for your dogs can keep them contentedly busy (working) and out of trouble for long periods of time. Add more stuffed KONGs to increase their work time. Note - adjust bowl feeding as necessary to maintain a healthy diet.

Regular use of KONGs can improve oral health.

#### **KONG Size Chart**

Please use this size chart as a reference to the dog's breed. The chewing habits of the dog need to also be considered. Strong chewers are recommended to use the **Xtreme Black KONG** instead of the **Classic Original Red KONG**. Please also consider moving up one or two sizes for dogs who are strong chewers!
