

## Meg-A-Cal Liquid

### Weight Gain Pet Supplements

*Thomas Laboratories*

A veterinarian recommended high calorie, high fat dietary supplement providing vitamins, minerals, and amino acids in a palatable, water-soluble gel or powder for all animals. Meg-A-Cal has shown excellent results for dogs recovering from parvovirus, finicky pets who are off food and losing weight, or performance animals that need something extra for energy and endurance. Meg-A-Cal is also indicated as treatment and preventative for hypoglycemia in dogs and puppies.

Meg-A-Cal is formulated to provide maximum calories in a minimum of volume. It replaces calories lost during athletic, endurance and competitive events. High calorie foods or fats will also help during stressful situations, such as fighting a disease like parvovirus, or when the animal may go off food and won't eat. Finding extra calories to gain weight can be a challenge. Weight gain requires more calories than your body may need. High calorie foods and supplements provide the extra caloric intake needed to exceed the functional amount of calories needed by the body to maintain weight.

- Post surgery patients
- Hypoglycemia
- Chronic illness
- Animals in competition
- Stressful conditions
- Working dogs

#### Directions:

**Liquid** - 1 tablespoon per 10 lbs body weight daily or as needed.  
Shake well before each use.
