MSM Equine Crystals For Horses

Horse Joint Supplements with MSM

Methlysulfonylmethane [MSM] is a natural, organic,dietary sulfur supplement that is a white, odorless, crystal, appearing similar to sugar and is noted for its exceptionally non-toxic nature. By weight, MSM is 34% bio-available sulfur, making it one of nature's richest sources of sulfur. Sulfur is the eighth-most abundant substance in body by weight. Elemental sulfur is present in every cell and is structurally and functionally important in more than 150 compounds in the body including tissues, enzymes, hormones, antibodies and antioxidants. In animals, the highest concentration of sulfur is found in the joints, hair, skin and nails.

Sulfur is critical in the formation of collagen and glucosamine - which are vital components for healthy bones, joints, ligaments, and tendons. MSM is recommended by veterinarians for animals with ligament, tendon, muscle, and joint conditions. MSM offers a natural effective relief of inflammation and pain. It has properties similar to aspirin, but without the aspirin side-effects.

Directions: Give 1 scoop twice daily per 1,000 lbs of body weight

Active Ingredients per 1 scoop:

Methlysulfonylmethane [MSM]: 25%

Container Sizes: 4 lbs and 10 lbs.

Precautions:

Store in a cool, dry place. Reseal after each use. For animal use only. Keep out of reach of other animals and children. In case of accidental overdose, contact a health professional immediately. This product should not be given to animals intended for human consumption.
