Sogeval MSM Tabs 400mg For Dogs and Cats

## **MSM Joint Supplements for Dogs & Cats**

MSM is a Vital Building Block of Joints, Cartilage, Skin, Hair and Nails

Sulfur is required by all animals for optimal health and performance. MSM [methylsulfonylmethane] is a source of bio-available sulfur, an important nutrient in the connection of disulfide bonds in articular and connective tissue and the synthesis of amino acids. MSM is also a natural antioxidant that inhibits and reduces inflammation.

MSM is an indispensable component in overall health. Its influence is found in every cell in the body and its nutrients are used to continually create new healthy cells to replace worn out cells. MSM supports joint flexibility, reduces stiffness and swelling and reduces pain associated with aging and injury. It plays a significant role in bones, muscles, skin, nails and hair health. In addition, it is a nutritional factor in connective tissue health and the formation of collagen. MSM is an especially versatile supplement and it provides the body with the raw materials needed for a healthy and active pet.

MSM is a natural sulfur-containing compound produced by kelp in the ocean. Sulfur is stored in almost every cell in the body. The highest concentrations are found in joints, hair, skin, and nails. MSM is claimed to be an antioxidant, cell rejuvenator, and joint healer.

MSM is reported to enhance the structural integrity of connective tissue, and help reduce scar tissue by altering cross-linkages which contribute to scar formation. MSM has been promoted as having powerful anti-inflammatory and pain reducing properties, blocking the pain perception in certain nerve fibers before the pain impulse reaches the brain.

MSM may fortify the body's natural barriers against allergens. Oral MSM has been reported to help alleviate the allergic response to pollen and food in pets.

Sulfur is needed to maintain the cell membrane permeability by regulating the sodium potassium pump. This system allows fluids and nutrients to flow freely into the cell and allows waste and toxins to exit the cell. Each time the body removes toxins from the cells, it also removes the compound that neutralized the toxin. This is why sulfur is needed in the diet on a frequent, regular basis.

Sulfur is necessary for the production of collagen and keratin, protein substances necessary for the health and maintenance of the skin, nails and hair. Sulfur is given for a variety of skin disorders and is especially useful when the skin is red as in cases of Allergic Dermatitis in dogs.

MSM is an effective pain killer for many types of chronic pain. MSM blocks the transfer of pain impulses through nerve fibers [C-Fibers]. MSM also blocks inflammations and inflammatory processes, and enhances the activity of cortisol, a natural anti-inflammatory hormone produced by the body. MSM also acts as a muscle relaxant which benefits the chronic pain associated with muscle tension. The types of pain treated successfully with MSM include traumatic injury, osteoarthritis, spinal pain, muscle pain, burns and post-operative pain.

**Available Size:** 100 unflavored tablets
