ADAPTIL DOG APPEASING PHEROMONE COLLAR

Ceva Animal Health

Adaptil Collars contain **D.A.P.** (Dog Appeasing Pheromone) which mimics the pheromone that the mother dog produces to calm and reassure her puppies. Dogs recognize these pheromones throughout life as these pheromones appear to have a relaxing effect for both the young and adults.

USES

Adaptil Collar stays with your dog all the time to help control stress-related behavior - Introduction of new puppy, Going on walks, Thunderstorm season, Fear of traveling, Puppy socialization, Boarding and grooming, Fireworks and gunshots

INSTRUCTIONS FOR USE

Fasten the collar around your dog's neck and adjust. Cut off the excess portion of the collar. The effects of one collar last up to 4 weeks. Combining the Adaptil Collar with Adaptil Diffuser indoors for stress-related behavior achieves optimal results.

CAUTION

Remove the collar before bathing or shampooing your dog and replace it after the dog's coat is dry. Collar will not release pheromone when wet.

Do not use collar on dogs with extensive skin lesions.

Adaptil Collar is not a pharmaceutical product. This product was formerly known as the D.A.P. Collar.
