

ATROPINE SULFATE INJECTION 15 MG/ML L.A.

RXV

STERILE MULTIPLE DOSE VIAL

**CAUTION:** Federal law restricts this drug to use by or on the order of a licensed veterinarian.

For use as an antidote in the treatment of organophosphate insecticide poisoning of cattle, horses and sheep.

**EACH mL CONTAINS:**

Atropine sulfate	15 mg
Sodium Chloride	9 mg
Benzyl Alcohol (preservative)	1%
Water for Injection	q.s.

The pH is adjusted with sulfuric acid and/or sodium hydroxide if necessary.

**DOSAGE AND ADMINISTRATION:**

**Initial Dose:**

Cattle - 30 mg per 100 lbs. of body weight.

Horses - 6.5 mg per 100 lbs. of body weight.

Sheep - 50 mg per 100 lbs. of body weight.

The recommended average initial dose should be split, injecting 1/4 to 1/3 slowly intravenously, and the remainder intramuscularly or subcutaneously. After symptoms appear to be under control, repeated maintenance doses should be administered based upon the individual response of the animal.

**WARNING:** Poisonous alkaloid. For animal use only. Keep out of the reach of children. Antidotes: Warmth, emetics, cholinergics.

Store at a controlled room temperature between 59°-86°F (15°-30°C).
