## C.E.T.® **HEXTRA**™ PREMIUM CHEWS FOR DOGS

Virbac

### **Premium Chews with Chlorhexidine for Dogs**

#### **HOME DENTAL CARE**

#### **FOR VETERINARY USE ONLY**

#### **Pets Have Teeth Too!**

Home dental care is as important for your pet as it is for you. A program of oral hygiene and regular professional care may help prevent problems that might occur as the result of plaque and tartar buildup. Routine home dental care should be a part of every pet's preventive medicine program.

**C.E.T. Home Dental Care features three easy steps to make pet oral health care as easy as 1-2-3!**

#### **C.E.T. Home Dental Care - 3 Easy Steps to Better Oral Health**

The C.E.T. 3 Easy Options method provides dental care options for all pets, regardless of size, age, temperament, or time constraints of busy owners. Begin where you and your pet are most comfortable, or use all 3 steps in combination for fresh breath, cleaner teeth and better health for your pet.

#### **Good to Chew**

As simple as giving a daily treat, great tasting **C.E.T. HEXtra** Premium Chews with the patented, exclusive Chlorhexidine System help remove plaque and reduce tartar. The chlorhexidine system, combined with the natural abrasive cleansing action of **C.E.T. HEXtra** Premium Chews, helps to keep breath fresh and teeth clean. Use **C.E.T. HEXtra** Premium Chews daily as an oral hygiene option on those days when brushing isn't possible.

#### **Better to Rinse**

Chlorhexidine-based C.E.T. Oral Hygiene Rinse and C.E.T. Oral Hygiene Gel can provide effective plaque control without brushing. These antiseptic products make a great complement to a regular chew program. Ask your veterinarian to help design a program especially for your pet.

### **Best to Brush!**

Just as it is for us, toothbrushing is the best method of ensuring that pets will enjoy good dental health. Daily brushing with C.E.T. Toothpastes and Toothbrushes provides the very best in Home Dental Care for your pet. C.E.T. Toothpastes and Toothbrushes are specifically designed for dogs' and cats' special needs. Just a few minutes a day is all it takes for the best dental care available.

**DIRECTIONS:** *Treat every day, all year 'round!* Give your dog at least one chew daily, or as directed by your veterinarian, to help reduce plaque and calculus. This product is intended for intermittent or supplemental feeding only.

Just as you brush and care for your teeth every day, your pets need daily care all year 'round. Be sure to stock up on C.E.T. products before you run out. It only takes a minute, and usually does not require an appointment or office visit. Your pet will reward you with healthy teeth and gums!

As with any pet product not intended for human consumption, please keep out of reach of children and wash hands after handling.

**ACTIVE INGREDIENT:** C.E.T. **HEXtra** Premium Chews are coated with a patented 10% (w/w) solution of chlorhexidine gluconate. **ALSO CONTAINS:** Beefhide, maltodextrin, hydrolyzed poultry liver (enzymatic), tetrasodium pyrophosphate, salt, lecithin, sodium gluconate, potassium sorbate, gluconodelta lactone, mineral oil, mixed tocopherols, rosemary extract.

**C.E.T. HEXtra** Premium Chews with Chlorhexidine (and all C.E.T. products) are available only from your veterinarian. In fact, **C.E.T. HEXtra** are the only chlorhexidine-based chews available! Insist on the best: **C.E.T. HEXtra** and your veterinarian.
