### MINIMUM GUARANTEED ANALYSIS

**EACH 3.3 GRAMS (1 level scoop) CONTAIN:**

|                                     |           |
|-------------------------------------|-----------|
| Manganese* minimum                  | 16 mg     |
| Glucosamine Hydrochloride† minimum  | 1800 mg*  |
| Sodium Chondroitin Sulfate† minimum | 600 mg* ▲ |

\*Not recognized as an essential nutrient.

**Ingredients:** Glucosamine hydrochloride (derived from shellfish), microcrystalline cellulose, sodium chondroitin sulfate (derived from bovine cartilage), and manganese ascorbate.

†COSEQUIN® contains FCHG49® 99% Glucosamine and TRH122® Sodium Chondroitin Sulfate, Nutramax Laboratories® exclusive veterinary researched specifications.

▲ Reported on a hydrous basis.

\* From manganese ascorbate.

Store in a cool, dry area out of direct sunlight. Keep lid tightly secured to ensure freshness.

This container contains (1) non-toxic desiccant to help preserve freshness and ensure the shelf life of the product.

▼ Source: Surveys conducted in the Fall of 2002, March 2004 and September 2007 of equine veterinarians who recommended oral joint health supplements.

**Directions for Administration:**

Simply add Cosequin Powder to your horse's feed following administration chart below. If your horse is not fed sweet feed, you can add a small amount of water or molasses to get the Cosequin to stick to the grain. You can also add molasses to appease a more finicky horse.

|                | Initial 2-4 Weeks               | Economical Long-Term Administration |
|----------------|---------------------------------|-------------------------------------|
| Under 600 lbs  | 2 scoops in AM & 2 scoops in PM | <b>1 scoop daily</b>                |
| 600 - 1200 lbs | 3 scoops in AM & 3 scoops in PM | <b>1-2 scoops daily</b>             |
| Over 1200 lbs  | 4 scoops in AM & 4 scoops in PM | <b>2 scoops daily</b>               |

This chart should be used for guidance.
