

FortiFlora Canine Nutritional Supplement

Purina Veterinary Diets® FortiFlora® can help improve your dog's intestinal health. This unique supplement contains live active cultures and is recommended for the dietary management of dogs with diarrhea. It tastes great and can be easily sprinkled on a dog's food.

Dietary Characteristics

FortiFlora is a nutritional supplement for dogs and has been formulated to achieve the following characteristics:

- Contains a special strain of probiotic that has been proven to promote intestinal health and balance
- Contains a guaranteed amount of live active cultures
- Promotes a healthy immune system
- Contains high levels of antioxidant Vitamins A, E, and C
- Excellent palatability

How does FortiFlora work?

FortiFlora may help nutritionally manage dogs with diarrhea in many situations, including:

- Stressful situations such as boarding or change in home environment
- Diet change or consumption of inappropriate foods
- Soft stool in puppies
- Antibiotic therapy

Ask your veterinarian how FortiFlora can help your dog's diarrhea.

Feeding Instructions

Feed 1 sacket to your dog daily.

USE ONLY AS DIRECTED BY YOUR VETERINARIAN
