HEXADENE® FLUSH SOLUTION

Virbac

FOR DOGS, CATS AND HORSES

CHLORHEXIDINE GLUCONATE 0.25%

ANTISEPTIC

HEXADENE® Flush Solution with Spherulites® is a topical antiseptic solution containing 0.25% chlorhexidine gluconate and triclosan in a stabilized vehicle with an appealing floral fragrance.

SPHERULITES: an exclusive and patented encapsulation system developed by Virbac; provides a slow release of the ingredients long after product application.

Chitosanide: a natural biopolymer that creates a protective film on the skin and hair. This reinforces the hydrating and restoring properties of the formulation, helping to protect the skin against damage from the environment.

USES

HEXADENE Flush Solution has been specifically formulated for dermatologic conditions where an antiseptic flush may be beneficial. It may be used on dogs, cats and horses of any age.

ACTIVE INGREDIENTS

Chlorhexidine gluconate 0.25%.

CONTAINS

Water, propylene glycol, Spherulites, chitosanide, fragrance, triclosan, FD&C blue #1. May also contain lactic acid. Chlorhexidine diacetate is present in encapsulated (SPHERULITES) form. Propylene glycol is present in encapsulated (SPHERULITES) and in free forms.

DIRECTIONS FOR USE

Shake well before use. Apply **HEXADENE** Flush Solution onto the affected area. If necessary, remove excess solution or debris after use with cotton or absorbent material.

Frequency of use: Apply once daily. Continue for 2 to 3 days after apparent resolution of clinical signs or as directed by your veterinarian.

WARNING

Keep out of reach of children. Wash hands and exposed skin after use.

CAUTION

Federal Law (USA) restricts this drug to use by or on the order of a licensed veterinarian.

For animal use only. For topical use only. Avoid contact with eyes and mucous membranes. Consult a veterinarian before using on a debilitated animal. If condition does not show improvement after one week, discontinue use of the product and consult with your veterinarian.

AVAILABLE THROUGH LICENSED VETERINARIANS ONLY
