

NUPRO

All Natural Dog Supplement

Premium Ingredients

***" We are the original!
Over 16 years of PROVEN SUCCESS,
NUPRO really works!"***

NUPRO All Natural Dog Supplement was researched and developed by a nutrition doctor. It is a totally holistic product that replaces the vitamins, minerals, and digestive enzymes that a dog does not get from his processed food. In other words, what we are doing is replacing with natural ingredients what a dog would normally have gotten in the wild. It is excellent for all breeds and all ages from puppies to geriatric.

NUPRO's quality ingredients are as follows:

DESICCATED LIVER:The ultimate in palatability! This fresh, natural flavor of real liver is wonderful for the finicky eater because when mixed with water, makes a great gravy that dogs crave. Supplies iron and B vitamins

NORWEGIAN KELP:A natural seaweed that is a rich source of trace minerals including iodine, which is used for proper glandular function and metabolism. An excellent source of vitamins A, B1, B2, C, and E. These vitamins are beneficial for maintaining proper health and are responsible for the growth of bones, a healthy heart rate, a sound central nervous system, and helping muscles stay firm and strong. Norwegian kelp grows deep in the ocean, mostly in cold waters, so it contains valuable nutrients from the ocean floor. Aside from nourishing the glands, it is beneficial for overall good health. Supports healthy pigmentation and coat highlights.

MICROPULVERIZED BEE POLLEN:One of nature's healthiest and most powerful 'superfoods.' Bee pollen contains an incredible array of vitamins, minerals, amino acids and enzymes. It's one of the most nutritionally complete natural substances found on earth. Supports a healthy immune system. Keeps healthy hormones in balance. Supports allergy protection.

IMPORTED YEAST CULTURE:Helps maintain a full and healthy coat which may minimize the occurrence of excessive shedding, hot spots and itchy, dry fur. Provides proteins, zinc and biotin. Best source of B vitamins. Most companies use cheaper brewers yeast which can be a combination of hops, corn, grains, wheat, etc., whatever comes from the brewery. Many animals have grain allergies, and this ingredient may further aggravate an allergy condition. With nutritional yeast culture, it is grown on sugar beets, a veggie source, so NO grains are present at all. Something to think about when reading ingredient labels.

FLAXSEED AND GROUND BORAGE SEED:Provides essential fatty acids. Most absorbable vegetable fatty acid for the canine. Rich in omega 3 fatty acids, alpha-linolenic acid, fiber and lignans. Helps maintain healthy shiny fur and soft skin.

LECITHIN: A rich source of choline, which the body requires to make acetylcholine, a neurotransmitter which is essential for normal, healthy nerve and brain function. Supports healthy liver function, too.

GARLIC CONCENTRATE:Wonderful ingredient that does so much for the body. Garlic contains allicin, a broad-spectrum antimicrobial capable of warding off different types of infection. Supports a healthy immune system.

LACTOBACILLUS ACIDOPHILUS:Promotes healthy digestion which may reduce the occurrence of flatulence. Because NUPRO is in a powdered form and not from concentrate, it is easily assimilated into the system and digested with the dog's food. There is no sense in giving an animal this superior product if they don't digest it properly. Also promotes friendly bacteria in intestinal tract.

CALCIUM CITRATE: Calcium is best absorbed in an acidic environment, hence calcium citrate is the best absorbed supplemental form of calcium---it does not require extra stomach acid for absorption. Intended to provide nutritive support for healthy bones, teeth and nerve function.

NUPRO is made with fresh quality health food ingredients that are human-grade, not animal-grade. Contains a full range of vitamins, minerals, enzymes, amino acids, and essential fatty acids in their natural raw forms. Whether you use commercial diets, feed B.A.R.F., or cook for your animals, NUPRO is an essential part of your daily nutritional program.

NUPRO does NOT contain any of the following:

Wheat, Sugar, Fillers, Preservatives, By-Products, Grains or Corn

So, Treat your best friend to a healthy life with NUPRO all natural dog supplement!
