Protegrity GI Canine Probiotic Soft Chews

Stool Quality & GI Health

Protegrity GI is a clinical-strength health supplement formulated to promote a balanced GI system for the overall health and well-being of dogs. Contains the probiotic *Bacillus subtilis* PB6, as well as a blend of other probiotics and prebiotics that help improve stool quality and supports normal GI health.

Dogs are challenged with digestive problems from stress related travel, boarding, grooming, antibiotics, dietary indiscretions and anxiety. Protegrity GI is the only probiotic supplement for dogs that contains the patented probiotic *Bacillus subtilis* PB6, which is backed by over a decade of research and has been scientifically proven to be safe, stable and beneficial. PB6 promotes optimum GI health by inhibiting the growth of several key intestinal pathogens, including those associated with diarrhea, to help maintain normal stool quality and GI function. In addition, PB6 does not interfere with the good bacteria that are necessary for optimal GI health. Along with PB6, Protegrity GI contains a proprietary blend of other probiotics and prebiotics to provide complete protection and to help maintain GI health.

When choosing a probiotic, it's important to remember that not all probiotics have the same activity in the lab or in an animal. While other products in the marketplace may contain *Bacillus subtilis* species, only Protegrity GI contains the patented and proven PB6 strain. Research has shown that PB6 works better than other *Bacillus subtilis* strains to help maintain optimal GI balance and to help provide better protection against intestinal pathogens. Protegrity GI also provides a high level of stability, meaning that it maintains its beneficial effects throughout its shelf life.

While many probiotics on the market are taken in powder or tablet form, which are often unfavorable and inconvenient, Protegrity GI is available in a highly palatable chew. Protegrity GI offers dogs an easy-to-consume probiotic—making maintaining gut health easier for dogs, dog owners and veterinarians alike.

Directions:

For all dogs, 1 chew daily or as directed by your veterinarian.

Active Ingredients per Chew

Kemin Bacillus subtilis PB6 . . . 100 mg

Proprietary Probiotic Blend . . . 100 mg

(Bifidobacterium bifiduum, Enterococcus Faecium, Lactobacillus casei)
