RENAL K⁺™ GEL

Vétoquinol USA

(Potassium Gluconate)

A Potassium Supplement with B-Complex Vitamins

INGREDIENTS: Purified Water, Potassium Gluconate, Sodium Carboxymethylcellulose, Potassium Sorbate, Sodium Benzoate, Artificial Sweetener, Maple Flavor, Citric Acid, Thiamine HCl, Nicotinamide, Calcium Pantothenate, Pyridoxine HCl, Riboflavin 5'-Phosphate Sodium, Folic Acid, Biotin, and Cyanocobalamin.

INDICATION: For use as a supplement in potassium deficient states in cats and dogs.

DOSAGE: Each 2.5 mL (1/2 teaspoon) contains 2mEq of potassium (as potassium gluconate) in a palatable base. The suggested dose for adult cats and dogs is 2.5 mL (1/2 teaspoon) per 10 lbs (4.5 kg) body weight given orally twice daily. Adjust dosage as needed.

ADMINISTRATION: RENAL K⁺ is a highly palatable gel. Place a small amount on animal's nose to stimulate taste interest. Once initial interest has been established, gel may be administered from a syringe or teaspoon.

PRECAUTION: Use with caution in the presence of cardiac disease, particularly in digitalized patients.

WARNING: Do not administer to cats or dogs with acute, oliguric, anuric or very advanced renal failure. Do not administer in other diseases where high potassium levels may be encountered, such as adrenal insufficiency, acute dehydration or urethral obstruction.
