

# Urine-Off UV Urine Finder

## Easily Locates Dried Urine Stains!

**The odor of dried urine crystals can persist for years. Guessing where to apply Urine-Off can be time consuming, frustrating and wasteful. With the Urine-Off Finder, you can:**

- Eliminate guesswork
- Identify the precise locations of dried urine
- Save money and time by using Urine-Off Only where needed
- Eliminate all old urine odors at their source, once and for all!

The Urine-Finder UV Black Light is specifically custom-engineered with an ultra-violet fluorescent tube to locate those hidden, dried urine salt crystals-invisible to the naked eye. Locate the hidden urine odor sources and treat the "right" spot with Urine-Off.

- Use protective eyewear - prolonged exposure to UV rays can damage eyes.
- Area must be dark! Crystals in dry urine deposits refract UV light and glow a bright yellow.
- Locate problem areas using black light, apply Urine-Off according to product directions.
- Urine-Off breaks down urine salt crystals, removing stain and odor permanently. Area is Black Light Clean!
